
CHEMnetBASE

CHEMnetBASE makes several heavily used chemical dictionaries available to researchers in an electronic, searchable form. The database is updated on a regular basis and contains chemical structures and detailed physical property data on thousands of chemical compounds, making accessible information that is very difficult to locate in existing print versions of the dictionaries. Acquiring the online version of these texts will make it extremely easy for students (especially undergraduates) and faculty to find important data needed for their papers and research.

Database

Cost: \$107,500*

*Cost reflects a five year subscription, requested by the Libraries in order to ensure continuous access to the database. Please contact B.J. Johnston, Associate Dean of Collections and Departmental Libraries (bj.johnston@wustl.edu or 314-935-5468) for details.
