

Scopus

Scopus contains more than 14,000 scientific, technical, medical and social sciences titles from 4,000 publishers and is set to be the largest single Abstract and Indexing (A&I) database ever built. More comprehensive than any other single existing A&I database, *Scopus* will offer cross-discipline access to more than twenty-seven million abstracts and citations, stretching back to 1966, including cited references from 1996 onwards. Covering a truly global selection of high-quality titles, *Scopus* offers users access to more European and Asia Pacific literature than is covered in any other A&I database.

Database

Cost: \$200,000*

*Cost reflects a five year subscription, requested by the Libraries in order to ensure continuous access to the database. Please contact B.J. Johnston, Associate Dean of Collections and Departmental Libraries (bj.johnston@wustl.edu or 314-935-5468) for details.
