Creator: Daniel Isadore Bolef.

Title: Dan Bolef Papers.

Dates: ca. 1946 – 1987.

Quantity: 108 linear feet.

Language: English.

## **Biographical Note**

Daniel Isador Bolef was born June 10, 1921 in Philadelphia, Pennsylvania. He studied physics at Columbia College under Professors Rabi and Kusch (A.M. 1948, Ph.D. 1952) and during this time taught as an Instructor in Physics at Stevens Institute of Technology and an Instructor in Mathematics and Physics at the State University of New York. In 1952 he was promoted to Assistant professor of Physics at State University. From 1953-1963 Bolef worked as a research physicist in the area of nuclear magnetic resonance for the Westinghouse Research Laboratories. In 1963 Bolef joined the faculty at Washington University in St. Louis as Professor of Physics, becoming a Professor Emeritus in 1983.

## **Scope and Content Notes**

Included in the collection are course notebooks from Bolef's graduate studies, and research related papers from his work at Westinghouse; of note are research materials related to masers. Laboratory manuals and other teaching materials, professional correspondence, grant proposals, and other papers related to Bolef's time in the Physics Department (College of Arts and Sciences) at Washington University are also part of the collection. In addition, there is a large group of materials related to arms control, nuclear energy and proliferation, Vietnam, the draft, civil rights, and other social issues covering the 1960s through the early 1980s. Approximately 45 linear feet of materials transferred are currently unprocessed and housed after Series 14.

## **Arrangement**

This collection is divided into 14 series as follows:

- Series 01: Physics and professional
